

## **Volunteer Core – Natural Science (NS) Rubric for Student Assessment**

Note: Courses in the area should only use the rubric for objective questions as given in Section 2.e and as shown below:

### Rating scale for objective questions (for multiple choice tests, etc.)

This type of scale should be used with any assignment or test that can be graded as points or percentages. You should grade each student's work as you normally would, then turn each individual student's score into a rubric value (1-4) based on the following scale:

- 1 = Ineffective: the individual student scores below 60% on selected questions.
- 2 = Adequate: the individual student scores between 60-74% on selected questions.
- 3 = Effective: the individual student scores between 75-89% on selected questions.
- 4 = Outstanding: the individual student scores 90% or above on selected questions.
